

NEW YORK STATE ASSOCIATION
of
COUNTY CORONERS
and
MEDICAL EXAMINERS

December 2019

Dear NYSACCME Family and Friends:

As 2019 comes to a close, it's time to rejoin or become a new member of NYSACCME.

In order to do the best job you can possibly do, you NEED training, you NEED knowledge and you NEED continuing education...all of which NYSACCME offers two times a year. We need your continued support and assistance!! NYSACCME has become a State-Recognized authority for opinions of many pieces of legislation. As a member of NYSACCME, you lend credibility to your Office and to yourself both professionally and personally.

We continue to offer the MANDATORY TRAINING for NEWLY ELECTED CORONERS. Our previous Coroner 101 class held this past February was well attended with positive feedback. We will be offering the 2020 Coroner 101 Class again on Saturday, February 8, 2020 at the Crowne Plaza Hotel in Syracuse, NY beginning at 8am. We are so proud to be the only entity offering this class and for those of you who don't have to take it...the class is also a great refresher.

I would ask YOUR support not only in membership, but with participation in attending our educational conferences. Please consider being a presenter at one of our conferences. Better yet, consider hosting a conference! How about helping to find companies that might want to grow their publicity opportunities by sponsoring part of our conference expenses? Recommit to furthering YOUR knowledge to remain the best qualified and trained person in your position. Resolve to afford yourself every opportunity to further your education in the area of Medicolegal Death Investigation and Forensic Science and renew your membership in NYSACCME.

As Counties continue to cut back, remember, it is up to YOU to be informed, educated and to learn about the most up-to-date information, tests, changes in protocols/laws and tools of the trade. The Families that we serve deserve the best service we can provide! I urge your participation in continuing the tradition of leadership, professionalism and high levels of training that NYSACCME members have been known for throughout the last several decades. The information we provide is invaluable and extremely affordable compared to other professional organizations. Thank you in advance for your commitment to excellence and continuing to educate yourselves!

Please join/re-join NYSACCME today!! Encourage your colleagues to do so as well.

Fondly,

Scott
